

PACKING INSTRUCTION

You don't need to be a mechanic to travel with Stevox bike cases, packing takes only 15 minutes and requires basic tools. Compared to traditional size bike cases nothing but two additional steps of disassembly needed, but you can save money on each flight on bike fees.

Needed tools: set of allen keys, tape, might require torx keys or set of wrench.

1.

Mark your saddle height and remove the seatpost.

2.

Remove the pedals, than remove the wheels and the quick releases. Put them in your gearbag.

3.

Loosen the stem's screws (pinching the fork) and unscrew the nut's screw and cap.

4.

Remove the stem & handlebars from the fork, pull out the fork from the head tube. Put the rings, nut screw, and the cap back on the fork.

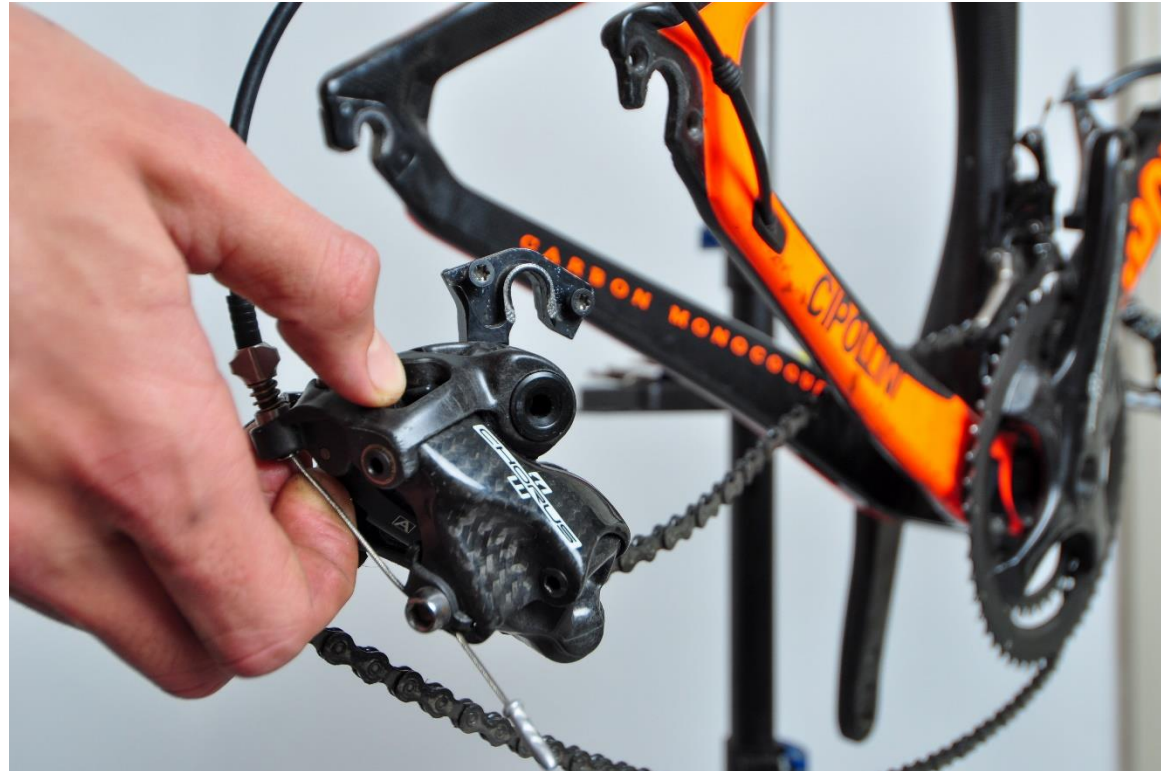

5.

Remove the front brake from the fork (it's not necessary, but it makes packing easier).

6.

Remove the rear derailleur with the hanger and cover it.

7.0.

Place your bike in your bike box as you see in the pictures and cover the frame with foam protection, deflate the tyres.

7.1.

Place your bike in your bike box as you see in the pictures and cover the frame with foam protection, deflate the tyres.
